## 📂 PROJECTS

**Hudle**
- Hudle is an India-based sports-tech platform that helps people discover, book, and play sports across cities.
- Tested Android/Ios App along with Admin panel where we manage all the activities related to sports,venues,Credit scrores.
- Used Locust with Python for Load Testing.

**Grayporter**
- **Grayporter** is a US- and UK-focused e-commerce platform offering premium products at discounted prices with exclusive deals. It features a robust Content Management System (CMS) for efficient backend operations. I led end-to-end testing for the e-commerce website and CMS, ensuring seamless functionality across all modules. Mykey focus areas were Product Variant Management and Warehouse Integration, crucial for product configurations and order fulfillment. Collaborating with cross-functional teams, I contributed to building a scalable, high   performance platform that optimized backend processes and enhanced the customer experience.
- Tested CMS and order management workflows, ensuring backend-to-frontend sync.
- Validated warehouse integration and product variant configuration.

**FUNRIDE - Web App**
- This project aims to create an e-commerce mobile responsive website exclusively catering to kids' toy products. The primary goal is to offer users a seamless platform for purchasing a diverse range of toys for children.The aim is to provide a convenient and efficient online shopping experience for individuals searching for toy products.
- Executed full cycle testing for a responsive e-commerce toy platform.

**Time Dial - Mobile App**
- This project aims to develop a mobile application tailored to the diverse needs of users navigating different time zoneson both iOS and Android. Designed for professionals, travelers, and enthusiasts, the app features a sophisticated user interface with a visually immersive dial-view and a detailed list view, ensuring a seamless time-tracking experience. For avid travelers, the app acts as an indispensable companion, offering integrated alarm and event functionalities, with native support on both iOS and Android platforms, streamlining schedule management and global connectivity
- Validated cross-platform mobile app handling global time zones and event alerts.

**SalesRight**
- **Salesright** is an AI-powered sales analytics tool that enhances sales performance through data-driven insights. It usesAI to analyze quotes, predict deal completion, assess salesperson performance, and optimize sales strategies.
- Verified AI-driven quote predictions and sales analytics.
- Worked with developers to validate data accuracy and resolve analysis bugs.
